In Intimate Relations Dave Russell plays a young lawyer who has recently won national fame winning a controversial, sensational case. Currently he is the darling of the media and, while that has some wonderful rewards.. . . it also makes a gay man very vulnerable. Something that might never have been a problem before, is suddenly the center of some not very nice people's attention. In the 70's gay was good. Now gay is gay and good is good and often the two do not necessarily meet. Naive, ingenuous and straightforward without being straight, Dave suddenly finds himself caught in a web of ugly minds, vicious emotions, violent action and mean-spirited sexuality that threatens to destroy everything that he values. . . his gayness, his career, his family and his community. Surrounded by gay deceivers, Dave is forced to cope with an oh-so-concerned new boyfriend who is out to blackmail him; a long lost brother who is a pretender and not beyond hiring a hit man when his disguise is threatened and a murderer who has Dave's real bother captured in sexual

bondage.

Hardly the stuff of adult movies, you say? Well, it seems to work pretty well here as four of the hottest sex scenes that the MINOTAUR cameras have yet captured are heightened and made more enthralling and arousing by the sharp-edged knife that lies just below the surface ready to plunge into flesh and destroy the beauty and the ecstasy.

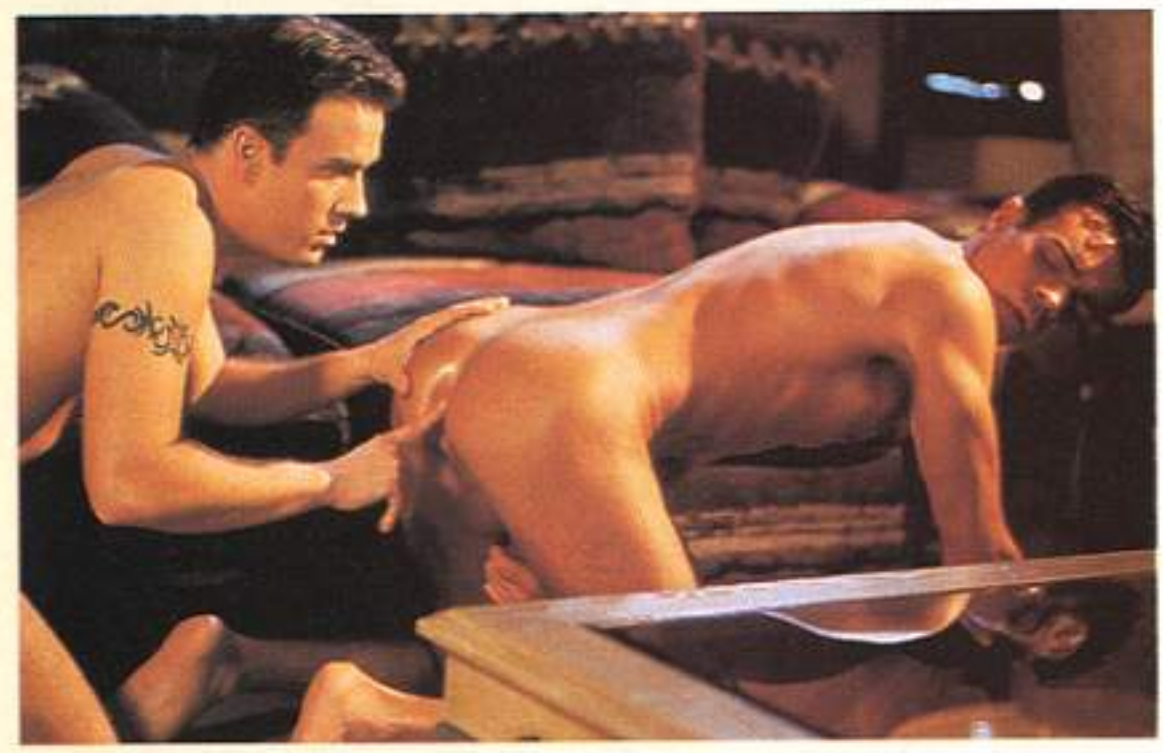
In the opening scene, blond David York makes himself readily avail-

able to his new lover as Dave's thick and handsome cock explores David's juicy holes. Gentle and tender at the start, these two men's lovemaking soon takes on a ferocious insistence that is almost frightening in its demand for release that culminates in virtual geysers of hot cum.

Meanwhile Matt Easton as Dave's real brother, is the subject of Scott Daniels' humiliating but powerful sexual demands. Matt willingly and hungrily answers all of Scott's cold and impersonal demands creating heat and passion within Scott in spite of the situation. And when these two drive each other over the top, they all but soak the entire room, As these two sex hungry studs groan and shout out their passion, Drew Andrews, as the fake brother, gets off alone in the living room as he listens to the intense language of lust.

Later, Drew is visited by Brad King who has been sent from Dave to check up on his brother. Brad checks Drew out in just about every way anyone might wish. The sofa turns into the seat of burning passion as these two perpetually horny sex studs give each other (and the breathless viewer) the very best of what they have to offer (and the viewer a super vision of just how sexually powerful and shattering good video sex can be). And it all reaches a peak with juicy, thick, powerful and plentiful releases of man's favorite flavor.

What happens next we leave to the storyteller. After what is done is done, and some time later, Dave is back on keel again. In fact he is writing a book about it all and sharing all of his secrets with the world. When his editor, Jeff



Dalton, suggests that this might not be the wisest course of action, we see that people will be true to themselves in spite of it all. If the naive, ingenuous and upfront survive it is the grace of the gods rather than any learning from the hell that they go through. Better shrug it off, and watch as Dave and Jeff decide they have better things to do than argue over a manuscript. And they do it. They do it very well indeed. Without sacrifice in the passion and intensity department, these two make sex that is tender and considerate at the same time that it is filled with driven lust and unleashed hyperactive libidos. Again the moment of truth is filled with copious showers of potent mancum.

As we viewed this show we were struck by how this show reminded us of those wonderful shows of the 70's—the dicks are eternally hard, the men are very much into the sex, and the climaxes are rich and fulsome--like they used to be but so rarely anymore.

Minotaur just gets better and better and Intimate Relations will stimulate you to new highs, tap your resources and drain your reserves time and time again.
